

# E-WASTE RECYCLING

## E-waste Recycling Service

### WHAT IS E-WASTE?

E-waste, also known as electronic waste, is a common term used to describe electronic products approaching the end of their “useful life.” Computers, monitors, televisions, PDAs, data collection equipment, copiers, fax machines, and their associated parts are common electronic products that are considered e-waste. *E-waste is the fastest growing segment of municipal solid waste, but it can be diverted through reuse, refurbishing, or recycling.*

### WHY RECYCLE E-WASTE?

Recycling e-waste decreases threats to human health and the environment, conserves natural resources, saves energy, and reduces the burden on local landfills. While computers are safe to use, they contain environmentally hazardous materials, including lead, mercury, and polychlorinated biphenyls (PCBs). Ryzex can safely remove and recycle these materials and help you keep them out of our landfills.

### HOW WILL I KNOW THAT MY PRODUCT IS RECYCLED?

Upon request, Ryzex provides a Certificate of Recycle showing

Recycling e-waste decreases threats to human health and the environment, conserves natural resources, saves energy, and keeps waste out of the landfills.

proof of recycling and of your dedication to corporate environmental responsibilities.

### WHERE DOES MY E-WASTE GO?

If something is still in good working condition, we find a use for it. At Ryzex, we believe that the best thing to do with useable recycled materials is to put those materials back to use, for their intended purpose – not thrown in the trash. Not only do we sell refurbished barcode equipment, we try to find uses for working TVs, cables, radios, printers, etc. All items are recycled in full compliance with state and federal laws. We have been audited by many organizations including the Washington State Department of Ecology and the EPA.

### HERE'S HOW TO GET STARTED:

- 1. CONTACT** Ryzex at 800.289.6282 and let them know you are interested in recycling e-waste.
- 2. FILL** a container with the electronic equipment you wish to have recycled.
- 3. SHIP** us your equipment to be recycled or contact Ryzex for a pick-up.
- 4. RECEIVE** an invoice in the mail detailing the waste that was received at our recycling facility.
