

*Ryzex can help lengthen the life of your equipment and stretch your technology dollars.*

The need to reduce costs isn't a new thing, but it is more important for some companies than it's ever been before. Ryzex offers a number of solutions to reduce your costs by increasing your return on your technology investment. Ryzex can keep your current equipment running, supply low cost options for replacement devices, provide short or long term rental products and even put some extra money in back your pocket today for your unused equipment.

Ryzex can support you – with 20 years of experience, 6,000 customers, and operations in North American and Europe, we can help you squeeze more years out of your current technology investment.

**REPAIR**

Ryzex is committed to supporting our customers with quality on-time repair services that help extend the life of mission-critical equipment. Ryzex can repair equipment long after the manufacturer has stopped support, at a price up to 40% less than the manufacturer's. If you have equipment that spans across multiple manufacturers or generations, Ryzex can eliminate the need for multiple vendors, purchase orders and invoices - saving you valuable time and money.

From handheld computers and label printers to wireless scanners and vehicle mounted units, Ryzex services a wide range of equipment either in-house or through strong OEM repair partnerships from 21 manufacturers like Motorola/Symbol, Intermec, Zebra and Psion Teklogix. Our state-of-the-art repair facilities are staffed by qualified service technicians delivering strong technical support and on time service.

When you choose Ryzex as your repair provider, you'll have 24x7 access to information, via our online repair portal. A secure login allows you to submit your repair requests, check status of your repairs, view repair history and run customized reports.

Ryzex does more than just repair your equipment, we serve as a backup plan to help you sustain operations and minimize downtime.

**PRE-OWNED**

Whether you are considering upgrading your devices, or need to supplement your existing inventory, Ryzex pre-owned products are a low cost alternative to new. Pre-owned products are also an option if you need to purchase legacy equipment that the manufacturer can no longer provide because that product is classified as end of build. Ryzex can offer you a cheaper, yet high quality alternative to new technology when you need it most. The price may be less, but there will be no compromise on quality.

*From repair and pre-owned, to buyback and rental, Ryzex is your single source for mission-critical support.*

To become Ryzex pre-owned, we submit all equipment to a merciless equipment inspection, testing and restoration program that rejects any hardware that fails to meet our rigorous standards. In the end, our pre-owned products have an out-of-the-box failure rate the same – or better than – the manufacturer’s new product. Additionally, each pre-owned product comes with Ryzex’s 90-day warranty. Ryzex’s Protection Plus extended warranties can also be attached therefore protecting and extending the life of your equipment for up to three years.

The cost advantage isn’t the only benefit of purchasing pre-owned products. Extending the life of equipment keeps them in use longer and out of landfills, making pre-owned products more environmentally friendly.

### BUYBACK

Our Buyback program provides an opportunity to get some cash out of your existing technology investment. If you have unused, under performing or depreciating barcode and data collection devices, it’s time to put them to good use. If you’re considering a technology upgrade, but need to reduce your out of pocket expense, Ryzex can help.

There are a variety of ways you can use our Buyback program:

- Turn in your old equipment for **cash**
- Retain the buyback value as a **credit** toward any future Ryzex product or service purchase
- **Trade in** your equipment, applying the buyback value toward the purchase of Ryzex new or pre-owned equipment

If we can’t buy back your unused equipment, we can recycle it for you. Not only can we help you save money, but you can benefit from favorable public relations – your waste is responsibly managed, not poisoning a landfill.

### RENTAL

Ryzex rental programs can provide access to devices when you need them, without the up front purchase commitment. Consider renting for a couple weeks during a peak period or for a longer period if you need equipment to run your business prior to budget availability. No matter what situation you’re in, we’ll find a solution to fit your needs.

If this sounds like you...	...here’s how Ryzex can help
“We’re moving our facilities and I need to double the number of available handheld barcode scanners for about two weeks.”	For temporary peaks in use, renting may be your best option.
“My department needs a complete AIDC installation right now, but we’re going through a technology review next year and I don’t want to commit to a platform today.”	Consider a rental or leasing agreement for longer-term use without a purchasing commitment.
“In eight months we’ll have a new installation, but until then, I need to fill in the gaps in our legacy system of discontinued products.”	We can rent and lease from a deep inventory of pre-owned equipment that has been discontinued by the manufacturer.
“Leasing is the right financing model, but at the end of the day, I need to build equity in products I can keep.”	Ask us about our barcode lease/purchase programs that give you ownership after the terms of the lease have been fulfilled.
